ABSTRACT	3
LIST OF NOTATIONS	9
LIST OF ABBREVIATIONS	9
INTRODUCTION.....	11
1. STATE OF THE ART REGARDING THE HYDROLOGICAL IMPACT OF CLIMATE CHANGE IN SMALL, FORESTED WATERSHEDS	12
1.1. A brief history of the climate change scenarios evolution.....	12
1.1.1. SA90 scenarios	12
1.1.2. IS92 scenarios	12
1.1.3. SRES scenarios	13
1.1.4. RCP scenarios	13
1.2. Climate change scenarios for Romania	16
1.3. Land and forest ecosystems vulnerability to climate change	19
1.4. Knowledge of climate change hydrological impact at watershed level.....	20
1.5. Hydrological models applied for assessing the climate change impact in small, forested watersheds	21
1.5.1. Hydrological modelling, a tool for projecting the hydrological impact of climate change.....	21
1.5.2. Hydrological models classification.....	22
1.5.3. A brief presentation of some hydrological model	23
1.6. Results of hydrological models applied for assessing the hydrological impact of climate change in small, forested watersheds	24
1.7. Main conclusions of the state-of-the art analysis.....	26
2. RESEARCH AIM, OBJECTIVES AND STUDY AREA LOCATION....	28
2.1. Aim and objectives.....	28
2.2. Study area location	29
3. RESEARCH METHODOLOGY.....	34
3.1. Adaptation of the SWAT model.....	34
3.1.1. Digital elevation model	34
3.1.2. Weather database.....	39
3.1.3. Soil database	40

3.1.4. Land use database	44
3.2. Run the SWAT model.....	45
3.3. SWAT model calibration and validation	47
3.4. Regional climate scenarios tailored to the local conditions of the study area.....	55
3.5. Precipitation and air temperature projections using local climate change scenarios for the 2020–2100 period	60
3.5.1. Projections regarding the annual precipitation	60
3.5.2. Projections regarding air temperature.....	63
3.6. Land use change scenarios.....	65
3.7. Brief summary and conclusions derived from the precipitation and air temperature projections.....	67
3.7.1. Predicted trend in precipitation evolution.....	67
3.7.2. Predicted trend in air temperature evolution.....	68
4. PROJECTED IMPACT OF CLIMATE CHANGE AND FORESTED AREA REDUCTION SCENARIOS ON HYDROLOGICAL PROCESSES WITHIN THE UPPER TÄRLUNG WATERSHED	69
4.1. Preliminary aspects	69
4.2. Surface runoff projected for the 2020–2100 period.....	70
4.2.1. Surface runoff in the short term (2020–2039)	70
4.2.1.1. Monthly surface runoff	70
4.2.1.2. Seasonal surface runoff.....	71
4.2.1.3. Annual surface runoff	72
4.2.2. Surface runoff in the medium term (2040–2069)	73
4.2.2.1. Monthly surface runoff	73
4.2.2.2. Seasonal surface runoff.....	74
4.2.2.3. Annual surface runoff	74
4.2.3. Surface runoff in the long term (2070–2100)	75
4.2.3.1. Monthly surface runoff	75
4.2.3.2. Seasonal surface runoff.....	76
4.2.3.3. Annual surface runoff	77
4.3. Water discharge projected for the 2020–2100 period.....	78
4.3.1. Water discharge in the short term (2020–2039).....	78
4.3.1.1. Monthly water discharge.....	78
4.3.1.2. Seasonal water discharge	78
4.3.1.3. Annual water discharge.....	79
4.3.2. Water discharge in the medium term (2040–2069).....	80
4.3.2.1. Monthly water discharge.....	80

4.3.2.2. Seasonal water discharge	80
4.3.2.3. Annual water discharge.....	81
4.3.3. Water discharge in the long term (2070–2100).....	82
4.3.3.1. Monthly water discharge.....	82
4.3.3.2. Seasonal water discharge	82
4.3.3.3. Annual water discharge.....	83
4.4. Sediment yield projected for the 2020–2100 period	84
4.4.1. Sediment yield in the short term (2020–2039)	84
4.4.1.1. Monthly sediment yield	84
4.4.1.2. Seasonal sediment yield.....	84
4.4.1.3. Annual sediment yield	85
4.4.2. Sediment yield in the medium term (2040–2069)	86
4.4.2.1. Monthly sediment yield	86
4.4.2.2. Seasonal sediment yield.....	86
4.4.2.3. Annual sediment yield	87
4.4.3. Sediment yield on the long term (2070–2100)	88
4.4.3.1. Monthly sediment yield	88
4.4.3.2. Seasonal sediment yield.....	88
4.4.3.3. Annual sediment yield	89
4.5. Statistical analysis of the influence of climate and land use change scenarios on surface runoff, water discharge and sediment yield	90
4.5.1. Statistical analysis for surface runoff.....	90
4.5.2. Statistical analysis for water discharge	92
4.5.3. Statistical analysis for sediment yield.....	94
4.6. Analysis of the frequency of the projections in the evolution of the annual surface runoff, water discharge and sediment yield	97
4.6.1. Methodological notes.....	97
4.6.2. Assessing the frequency matrices developed on considered periods	98
4.6.2.1. Surface runoff matrix.....	98
4.6.2.2. Water discharge matrix	99
4.6.2.3. Sediment yield matrix.....	101
4.6.3. The result of forecasts at the level of the entire period studied .. 102	
4.7. Brief summary and conclusions derived from the projected surface runoff, water discharge and sediment yield	107
4.7.1. Surface runoff	107
▪ Monthly surface runoff.....	107

▪ Seasonal surface runoff	108
▪ Annual surface runoff	108
▪ Monthly water discharge	109
▪ Seasonal water discharge	110
▪ Annual water discharge	111
4.7.3. Sediment yield	111
▪ Monthly sediment yield	111
▪ Seasonal sediment yield	112
▪ Annual sediment yield	113
4.7.4. The frequency of projected trends in the annual dynamics of surface runoff, water discharge and sediment yield	113
▪ Annual surface runoff	113
▪ Annual water discharge	114
▪ Annual sediment yield	115
5. FINAL CONCLUSIONS, PERSONAL CONTRIBUTIONS, PRACTICAL RECOMMENDATIONS, DISEMINATION RESULTS, FUTURE EXTENSIONS.....	116
5.1. Final conclusions.....	116
5.2. Original contributions.....	119
5.3. Practical recommendations	121
5.4. Results dissemination	123
A. Papers published in ISI indexed journals.....	123
B. In extenso papers published in Proceedings of journals indexed in international database (BDI).....	123
C. Papers published in BDI indexed journals	124
D. Papers published in international database	124
E. Papers presented at international symposia and conferences.....	124
F. Papers presented at innational symposia and conferences.....	125
G. Book and book chapter	125
H. Deliverables and research reports	126
5.5. Future works.....	127
ANNEXES.....	140
Annex 1. Monthly, seasonal, and annual surface runoff projected for the 2020–2100 period.....	140
Annex 2. Monthly, seasonal and annual water discharges ($m^3 \cdot s^{-1}$) projected for the 2020–2100 period.....	155
Annex 3. Monthly, seasonal, and annual sediment yield (tonnes) projected for the 2020–2100 period.....	170

Annex 4. The frequency matrix of annual surface runoff, water discharge and sediment yield for the 2020–2100 period	185
Annex 5. Dynamics of monthly surface runoff (mm) for the 2020-2039 period	188
Annex 6. Dynamics of seasonal surface runoff (mm) for the 2020-2039 period	188
Annex 7. Dynamics of annual surface runoff (mm) for the 2020-2039 period	189
Annex 8. Dynamics of monthly surface runoff (mm) for the 2040-2069 period	190
Annex 9. Dynamics of seasonal surface runoff (mm) for the 2040-2069 period	190
Annex 10. Dynamics of annual surface runoff (mm) for the 2040-2069 period	191
Annex 11. Dynamics of monthly surface runoff (mm) for the 2070-2100 period	192
Annex 12. Dynamics of seasonal surface runoff (mm) for the 2070-2100 period	192
Annex 13. Dynamics of annual surface runoff (mm) for the 2070-2100 period	193
